IN THE BOX

NetFy

T25 Torx wrench

Spudger

M5 spacer

PRODUCT INTRODUCTION

The NetFy is an innovative saddle mount for cyclists seeking advanced anti-loss capabilities. It integrates a built-in, high-precision tracker that monitors your bicycle's location in real time, with long-lasting battery life that ensures continuous operation during extended rides.

Anti-Tracking Mechanism Notice:

To protect user privacy, once this device joins the Apple Find My network, it may be detected as an "Unknown Accessory" by other Apple devices if separated from its paired device for

for over 72 hours. In such cases: If the accessory continues moving nearby, iPhone users may receive an alert stating, "An unknown accessory is traveling with you." If touched by others, the device will actively play a sound to indicate its presence.

Do not use this device for unauthorized tracking of individuals, as doing so may trigger the anti-tracking mechanism.

HOW TO INSTALL

1. Secure the rear mount

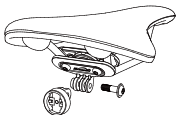

2. Adjust the spacers based on the saddle rail size

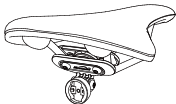

3. Tighten the front mount screws

4. Attach the GoPro mount

5. Tighten the adapter screws

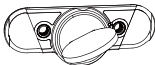

INSERT/REPLACE THE BATTERY

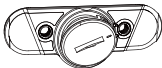

1. Insert a Spudger into the battery cover slot

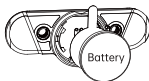

2. Rotate counterclockwise to unlock

3. Pry open gently with a sharp object

4. Insert/remove CR2032 battery

**WARNING:**

1. Please use CR2032 button cell battery and make sure the battery model is correct.
2. When inserting the battery, avoid contact with metal objects to prevent short circuits.
3. Dispose of used batteries according to local environmental regulations; do not discard them indiscriminately.

Battery Connection Precautions:

1. Ensure you connect the device within 10 minutes after inserting the battery. If more than 10 minutes have passed, remove and reinsert the battery to reset the device before attempting to connect again.
2. If the device fails to connect, try removing and reinserting the battery several times (at least 5 times) to ensure the device resets correctly.
